Type of Interview:

In-rerson

Date of Interview:

November 18, 2011

On November 18 2011, the WITNESS was interviewed at his place of employment by Senior Investigator Dennis Walters of Chenega Global Services, LLC. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary.

The WITNESS had been interviewed on November 17, 2005 by Investigator This was a follow up interview to attempt to gain further information regarding possible generators at the SITE.

The WITNESS began this interview by recalling that he drove a trash truck for Modern Trash Removal. Inc., from the mid 1960s until 1983. When asked what type of truck he drove, he described it as a Dump Master Front End Loader, the type that picks up dumpster in front of the truck and lifts them over the cab to dump the contents in the body of the truck.

WITNESS stated he seldom saw the contents of the dumpsters because they had a closed lid on them, except when something was spilled and had to be manually cleaned up. He said that was mostly household trash.

When asked if he could remember any of the locations from which he picked up dumpsters, he said it was mainly all up and down the Ritchey Highway in Baltimore. He recalled picking up at numerous apartment complexes and shopping centers. He mentioned the Edmondson Village Apartments, A&P Super Markets, Johns Hopkins Hospital, Two Guys Department Store near Inner Harbor, and a Color World Paint Store on Ritchey Highway.

When asked again if he had any knowledge of what he was collecting, WITNESS said again that he seldom saw any of the contents of the dumpster.

When asked where he took at loads of trash he collected, WITNESS said he went to a lot of dumps all over Baltimore. He noted that he went to the Rob Tyler Dump at Old Philadelphia Road and New Cut Road a lot. When asked if he was sure it was the Rob Tyler Dump, he answered "definitely." He said ninety percent of his trash went to the Rob Tyler Dump.

ENFORCEMENT CONFIDENTIAL

WITNESS also said he took loads to the 68th Street Dump. When asked to confirm it was the 68th Street Dump, he said "yes, that's the one off of Polaski Highway."

When asked if he went to the SITE, he said he didn't recall going there. When it was described and he was shown a aerial photo, he said he did recall going to a dump along the water in Dundalk, but he couldn't remember the name of it.

When asked about his former supervisor at Modern Trash Removal, Mr. Bohager, he said Mr. Francis Bohager is now deceased. Mr. Bohager would have had a lot of information about what trash was being picked up.

WITNESS was asked to review a list of companies to see if he could recall collecting trash at any of those locations. He asked that I read them to him due to his failing eyesight. I read the following list and noted his responses:

- American Standard, Inc.: No knowledge.
- Anchor Post Products, Inc.: No knowledge.
- Autoline Oil Company: No knowledge.
- Aventis Pharmaceuticals, Inc./Alcolac: No knowledge.
- Baltimore and Ohio Railroad: No knowledge.
- Baltimore City Hospital: No knowledge.
- Baltimore Copper Paint: No knowledge.
- Baltimore Gas and Electric Company: Yes, Did pick up, doesn't know the contents.

The WITNESS added that BG&E also had its own large dumpsters that were hauled to local dumps.

- Baltimore Paint and Chemical Corporation: No knowledge.
- Baltimore Tar Corporation: No knowledge.
- Baumiller Machine Company: No knowledge.
- Beazer East, Inc./Koopers: No knowledge.
- Bendix Company: No knowledge.
- Black and Decker: No knowledge.
- Borden Chemical Company: No knowledge.
- Brass and Copper Company: No knowledge.
- Browning-Ferris Industries/BFI: . Yes, He noted that Modern Trash Removal sold out to BFI and that he took truck loads to various BFI facilities.
- Budd Machine Craft Company: No knowledge.
- Burns Bottling Machine Works: No knowledge.
- Canton Railroad Company: No knowledge.
- Canton Warehouse Company: No knowledge
- Cello Chemical Company: No knowledge.
- Central Products: No knowledge.
- CGR Medical Corporation: No knowledge.
- Chemical Industry Group: No knowledge.
- Chesapeake Asphalt Products: No knowledge.
- Church Hospital: No knowledge.

ENFORCEMENT CONFIDENTIAL

- Clifton Conduit Company: No knowledge.
- Coast Guard at Curtis Bay: Yes, Did pick up, doesn't know the contents..
- Columbus Specialty Company, Inc.: No knowledge.
- Conchemco, Inc.: No knowledge.
- Container Corporation: No knowledge.
- Continental Can: Yes, Did pick up, doesn't know the contents.
- Crosse and Blackwell: No knowledge.
- Crown Cork and Seal Company, Inc.: Yes, Did pick up, doesn't know the contents.
- Curtis Steel Products: No knowledge.
- Delta Chemical: No knowledge.
- Dentocide Chemical Company: No knowledge.
- Dundalk Signs, Inc.: No knowledge.
- Duro-O-Wall Products, Inc.: No knowledge.
- Eastern Plating: No knowledge.
- Eastern Products: No knowledge.
- Edward Renneberg & Sons, Inc.: No knowledge.
- Exxon Mobile Corporation/Standard Oil: Yes, Did pick up, doesn't know the contents.
- F. Bowie Smith & Sons, Inc.: No knowledge.
- Fansteel Metallurgical: No knowledge.
- Farboil Paint Company: No knowledge.
- Fasco Machine Company: No knowledge.
- Fauldrath Paint & Hardware: No knowledge.
- Federal Paper Board Company: No knowledge.
- Fick Brothers Roofing: No knowledge.
- Firestone Company: Yes, Did pick up, doesn't know the contents.
- Fort Holabird/Fort Howard: Yes, Did pick up, doesn't know the contents.
- Francis Scott Key Medical Center: No knowledge.
- General Electric Company: Yes, Did pick up, doesn't know the contents.
- General Motors Corporation: Yes, Did pick up, doesn't know the contents.
- Greef Brothers Corporation: No knowledge.
- Grinding Specialties Company: No knowledge.
- Grumman Aerospace Corporation: No knowledge.
- H. S. Crocker Company, Inc.: No knowledge.
- Hanline: No knowledge.
- Haven Chemical Company: No knowledge.
- Herman Born & Sons, Inc.: No knowledge.
- Highland Press: No knowledge.
- HMH Construction Company: No knowledge.
- Holtite Manufacturing Company: No knowledge.
- Honeywell International, Inc./Allied Signal, Inc.: Yes, Did pick up, doesn't know the contents.
- Humble Oil Refining Company: No knowledge.
- IBM Company: No knowledge.
- Illinois Tool Works, Inc.: No knowledge.
- Industrial Coatings, Inc.: No knowledge.

- Inland-Ryerson Construction Products Company: No knowledge.
- Intercoastal Corporation: No knowledge.
- Interstate Amiesiete Corporation: No knowledge.
- IPI Inmont Printing: No knowledge.
- J. Donahue Paints: No knowledge.
- John Adams Company: No knowledge.
- John Deere Company: Yes, Did pick up, doesn't know the contents.
- Johns Hopkins Hospital: No knowledge.
- Kaiser Aluminum: Yes, Did pick up, doesn't know the contents.
- Kauffman Electric Company: No knowledge.
- Kewanee Industries, Inc./Bruning Paints/Chevron U.S.A., Inc.: No knowledge.
- Laco Corporation: No knowledge.
- Lasting Products Company: No knowledge.
- Lebanon Chemical: No knowledge.
- Landerking Metal Products: No knowledge.
- Lenmar Lacquers, Inc.: No knowledge.
- Lever Brothers: Yes, Did pick up, doesn't know the contents.
- Londontown Manufacturing Company: No knowledge.
- Lord Baltimore Press/International Paper/National Plastics: Yes, Did pick up, doesn't know the contents.
- Lucent Technologies, Inc./Western Electric: No knowledge.
- M&T Chemical: No knowledge.
- Magnetics, Inc.: No knowledge.
- Malco Plastics: No knowledge.
- Mankana Chemical: No knowledge.
- Maple Grove Mills: No knowledge.
- Maryland Cup Corporation: Yes, Did pick up, doesn't know the contents.
- Maryland Paint and Construction Company: Yes, Did pick up, doesn't know the contents.
- Maryland Precision Machine Company, Inc.: No knowledge.
- Masury Paint: No knowledge.
- McKenna Bindery: No knowledge.
- Merchants Terminal Corporation: No knowledge.
- Metal Masters of Baltimore: No knowledge.
- Mid-Atlantic, Inc.: Yes, Did pick up, doesn't know the contents.
- Millennium/SCM/HM Holdings: No knowledge.
- Monarch Rubber Company: No knowledge.
- Monumental Adhesives: No knowledge.
- National Brewing Company: Yes, Did pick up, doesn't know the contents.
- National Gypsum: Yes, Did pick up, doesn't know the contents.
- National Press of Baltimore: No knowledge.
- Nelson Company: No knowledge.
- Netzer Metalcraft: No knowledge.
- North Black Company: No knowledge.
- North Eastern Signs, Inc.: No knowledge.

- Noxell Corporation/Procter & Gamble Company: Yes, Did pick up, doesn't know the contents.
- Olin Corporation: No knowledge.
- Owens-Illinois: No knowledge.
- Owens Yacht Company: No knowledge.
- Palm Oil Recovery, Inc./Pori Oil: No knowledge.
- Patterson Calendar Company: No knowledge.
- Peabody Press: No knowledge.
- Pemco: No knowledge.
- Penn Central Railroad: No knowledge.
- Pennsylvania Railroad: No knowledge.
- Peterson & Moore, Inc.: No knowledge.
- Piracci Construction Company: No knowledge.
- Porcelain Glaze Metal Finishers: No knowledge.
- Pre-Soe: No knowledge.
- Prima Paint Corporation: No knowledge.
- Pritchard-King: No knowledge.
- Proctor-Silex Corporation: Yes, Did pick up, doesn't know the contents.
- Quality Chemicals: No knowledge.
- Race Printing: No knowledge.
- Red Head Oil: No knowledge.
- Reliable Printing Plates: No knowledge.
- Republic Steel Corporation: No knowledge.
- Revere Copper and Brass: Yes, Did pick up, doesn't know the contents.
- Rolline Rubber Company: No knowledge.
- Rubber Millers, Inc.: No knowledge.
- Rubbert Manufacturing Company: No knowledge.
- Ruckert Terminals: No knowledge.
- S. Goldman & Company: No knowledge.
- Sakar Brewery: No knowledge.
- Schaefer Brewery: No knowledge.
- SEM Corporation: No knowledge.
- Sculley Rubber Manufacturing: No knowledge.
- Seaboard Lacquer, Inc.: No knowledge.
- Security Plating: No knowledge.
- Shell Oil Company: Yes, Did pick up, doesn't know the contents.
- Sheraton Manufacturing Company: No knowledge.
- Sinclair and Valentine, Inc.: No knowledge.
- Solo Cup Company: Wasn't sure, See the note regarding American Cup Company below
- Standard Oil Refinery: No knowledge.
- Sweetheart Cup Company, Inc.: Yes, Did pick up, doesn't know the contents.
- Talbott and Hanson: No knowledge.
- The Baltimore Sun Company: Yes, Did pick up, doesn't know the contents.
- The Glidden Company/ICI Glidden Durkee: No knowledge.
- The Interstate Amusite Corporation: No knowledge.

- The J.S. Young Company: No knowledge.
- The JFW Dorman Company: No knowledge.
- The National Chemical Plastics Company: No knowledge.
- The Solaune Company: No knowledge.
- The United Oil Company, Inc.: Yes, Did pick up, doesn't know the contents.
- Thompson Steel: No knowledge.
- Tiger Press: No knowledge.
- Tomke Aluminum Company: No knowledge.
- U.S. Protective Coatings, Inc.: No knowledge.
- Vulcan Materials Company: No knowledge.
- Warner Freuhauf Trailer: No knowledge.
- Waste Management of Maryland-Baltimore, Inc.: Yes, took truck loads to the landfills they owned in the area. Doesn't know the contents.
- Webtex Company: No knowledge.
- Werner Graphics: No knowledge.
- Western Maryland Railroad: No knowledge.
- Westinghouse Electric Corporation: Yes, Did pick up, doesn't know the contents.
- Westwood Chemical: No knowledge.
- Wyeth Laboratories: No knowledge.
- Young Aniline Works: No knowledge.
- Zemco, Inc.: No knowledge.

In addition to the list, above, WITNESS recalled picking up loads at American Cup Corporation, Reisterstown Road, Reisterstown, MD and that he picked up loads from the Baltimore Shipyard.

He also remembered picking up at what he believed was Davidson Chemical Company at the foot of Carolina Street, in Baltimore. He wasn't sure if that was Davidson American Chemical. He also vaguely remembered the name Baltimore American Chemical Company at that location.

In addition, he recalled picking up loads at a liquor distillery on Washington Boulevard, but couldn't recall the name.

The interview began at 10:40 a.m., and ended at 12:05 p.m.

Note: On November 25, 2011, This statement was read to and reviewed with the WTINESS. He verbally attested (twice) to its accuracy as far as he can remember. However, he said it has been too long since he worked for Modern Trash Removal, and that he is attesting to his recollections from more than 25 years ago. Therefore, he declined to sign the statement.

I declare under penalty of perjury that the forgoing is true and correct.

Type of Interview:

In-Person

Date of Interview: February 3, 2012

On February 3, 2012, the WITNESS was interviewed at his residence by Senior Investigator Dennis Walters of Chenega Global Services, LLC. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary.

This interview was arranged and accompanied by Investigator Eugene O'Neill of FTI Consulting. The WITNESS had been interviewed previously by Investigator O'Neill who represents a group of PRPS at the 68th Street Dump in Baltimore City and Baltimore County.

The WITNESS was employed by both Robb Tyler and Herb Robertson in the 1950's and 1960's. He hauled trash for both employers. Robertson was acquired by Tyler sometime in the 1960's. The WITNESS had been interviewed by Investigator O'Neil regarding dumping at the 68th Street facility. WITNESS stated he left Tyler in the 1960's to drive cement trucks.

WITNESS was asked by Investigator Walters whether he had ever hauled trash and dumped at the Sauer Dump on Lynhurst RD, Dundalk, MD (SITE). He acknowledged that he had hauled trash to both the Sauer Dump on Lynhurst Road, (SITE) and 68th Street Dump.

When asked when he dumped trash at the Lynhurst Road (SITE), WITNESS stated that is was in the early 1960's. When asked to describe the SITE, he said he would drive into the SITE past a white house.

When asked if he knew anyone a the SITE, he said he knew Luke Sauer. He said everyone knew Mr. Sauer as the "Junkman." He said Luke Sauer owned the Lynhurst Road (SITE) and the Colegate Dump.

When asked what type of truck he drove to the SITE, WITNESS stated they were mostly roll offs.

When asked if he knew anyone other than Luke Sauer at the Site, he stated he did not remember any other names.

WITNESS was asked if he ever picked up trash at Fort Holabird. He said he picked up at Fort Holabird almost every day. He said Herb Robertson and Robb Tyler were friends and shared the trash pickups there. He stated he would make 10-15 stops at Fort Holabird each time he went there. He added that the work would vary because Robb Tyler and Herb Robertson would sometimes disagree about the workload at Fort Holabird, He said they would argue over some of the work, but then make up and share again.

WITNESS was asked what type of trash he picked up at Fort Holabird. He stated a lot of it was regular trash cans. He would stop at the motor pool and pick up container full of liquids and paint cans. He said they smelled bad and he would tell the employees to cover the containers before he took them. He said the workers at the Fort had to keep it clean, so trash was picked up every day; sometimes by Robertson drivers, sometimes by Tyler drivers and sometimes by both.

When asked what the liquids looked like, he said he tried to stay away from them because of the bad smell. When asked how long he picked up at Fort Holabird, WITNESS said 3 or 4 years.

When asked where he took the trash from Fort Holabird, he stated "anywhere they wanted me to." When asked if that included Lynhurst Road (SITE) he said he drove roll offs, dumpsters and cans to Lynhurst Road. HE said he would dump his loads near the "back" of the SITE, and they would quickly push it back toward the water. When shown a photo of the (SITE, WITNESS pointed to the area near the entrance and garage as where he dropped the loads. He reiterated that there was a lot of auto shop (motor pool) waste from Fort Holabird.

WITNESS noted that tin was a very popular material at that time, and Luke Sauer tried to salvage tin he could sell. He added "everyone did."

WITNESS was asked where else he collected trash that went to Lynhurst Road (SITE). He said he picked up from Fort Howard Hospital. He said most trash haulers picked up there, There was a lot of competition at that time. He said he used mostly roll offs and some cans to take the trash out of the hospital.

When asked when he picked up at the hospital, WITNESS stated is was a lot of red bags, He said would take them to 68th Street and Lynhurst Road (SITE). He said both the people at both dumps would quickly cover them up.

WITNESS was asked if he ever picked up from Farboil Paint Company. His response was "a whole lot." When asked what he picked up, he stated "everything they ordered him to load." He said it included paint cans and 55 gallon barrels. He could not remember the color of the barrels (drums).

When asked if he took loads from Farboil to Lynhurst Road (SITE), he answered "sometimes."

WITNESS was asked if he ever saw any type of electrical scrap at the Lynhurst Road (SITE). He said he saw electrical copper wiring and a few transformers at the SITE. He said Luke Sauer would break the transformers apart and take any "stuff" he could sell from them. He said he never hauled any of the transformers and wasn't sure where they came from.

When asked if he ever picked up trash from any Westinghouse facility, he said he did from the plant on Foster Avenue. and the one in Cockeysville. He did not describe the type of material, except to say to was "regular trash."

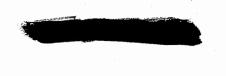

WITNESS then added that a Gerome Cross was a hauler who also took trash from Fort Holabird to Lynhurst Road (SITE). He is now deceased.

WITNESS indicated that he is willing to cooperate and be interviewed again, if necessary.

I declare under penalty of perjury that the forgoing is true and correct.

Type of Interview:

In-Person

Date of Interview:

February 3, 2012

On February 3, 2012, the WITNESS was interviewed at a McDonald's Restaurant on York Road in North Baltimore, MD, by Senior Investigator Dennis Walters of Chenega Global Services, LLC. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary.

This interview was arranged and accompanied by Investigator Eugene O'Neil of FTI Consulting. The WITNESS had been interviewed previously by Investigator O'Neil who represents a group of PRPS at the 68th Street Dump in Baltimore City and Baltimore County.

The WITNESS was employed by both Robb Tyler and Herb Robertson in the 1950's and 1960's. He hauled trash for both employers. Robertson was acquired by Tyler sometime in the 1960's. The WITNESS had been interviewed by Investigator O'Neil regarding dumping at the 68th Street facility.

WITNESS was asked by Investigator Walters whether he had ever hauled trash and dumped at the Sauer Dump on Lynhurst RD, Dundalk, MD (SITE). He acknowledged that he had.

When asked to describe the SITE, he said he would drive there by way of North Point Boulevard. He described entering the SITE past a white house. He described passing through a gate in the rear of the house and onto a blacktop drive way with dirt on both sides. He noted a large garage on the left of the driveway. He stated he knew Luke Sauer from this and other dump sites.

When asked what type of truck he drove to the SITE, WITNESS stated some were roll offs and others were flat bed trucks that were used to haul cans and other containers.

When asked when he drove trucks to the site, he stated it was in the late 1950's or early 60s;

When asked if he knew anyone other than Luke Sauer at the Site, he stated he knew Jim Johnston, who drove the bulldozer/loader and pushed the loads back toward the river and buried them. He said they were always in a hurry to bury the loads.

WITNESS was asked if he ever picked up trash at Fort Holabird. He stated that was a regular pickup site. When asked what type of trash he picked up at Fort Holabird, he stated "hazardous materials." When asked what he meant by "hazardous materials," he stated he picked up metal boxes full of chemicals. He described the boxes as being approximately the size of one gallon paint cans. They were painted brown or "Army colors." He said they smelled and he had to be careful never to get any of the liquid on his skin.

He also picked up 55 gallon drums of chemicals. He described the drums as also being brown or black. He didn't remember any orange or red drums. When asked where the boxes and drums were unloaded at the SITE, he said they were dumped near the garage area and "rolled over" toward the water and buried. The WITNESS was shown a picture of the SITE and confirmed by locating on the picture where the boxes and drums were dumped and buried. He noted that the people at the SITE would strip what metal they could sell before burying the trash.

WITNESS the n said he picked up similar boxes and drums of chemicals he described as "hazardous materials" at the Naval Training Station at Bainbridge, MD. He drove there by way of Md. Route 40 on a regular basis. He described how you would now exit I-95 at the Casino Exit (Exit 93) and drive east past a Pilot Truck Stop near Route 40 to get to the Naval facility.

He said it would take more than one hour to drive to the Naval facility because of the traffic lights along Route 40. He said this was before I-95 was completed. He said he picked up motor pool trash including the metal boxes of liquids at both the Naval Station and Fort Holabird.

WITNESS also added that while he was enroute to the Naval Training Station, he would collect trash at a Veterans Hospital at Havre de Grace, MD. That was a regular stop and he would pick up what he described as "bio-waste." He said he had to be careful not to touch any of the materials, which included "needles." He said he had been stuck on some occasions by the hypodermic needles.

WITNES stated he would take the trash collected at both the Naval Training Station and Veterans Hospital to the Lynhurst Road SITE and 68th Street Dump.

WITNESS also stated he picked up computer parts from the Naval Training Station, Fort Holabird and Baltimore Navy Yard in the late 1950;s and early 1960;s. They were discarded at both dumps.

The WITNESS was asked if he ever picked up trash from Farboil Paint Company. He said that was a regular stop at the plant on Key Highway. He said he picked up one gallon paint cans and black 55 gallon drums of what he described as "boat paint." He said that each time he

went to the Farboil plant to collect materials, he was issued a face mask to wear and was cautioned never to breath any of the liquids or allow them to touch his skin. When asked if the masks were like the ones you get in a hardware store to protect you from breathing fumes, he said "no, not the little white ones." He described these masks as large black rubber type material. He referred to them as a "respirator." When asked if he kept any of the masks to reuse, he said "no," they issued him a new one each time he went to the plant.

When asked what type of truck he used to haul the materials from Farboil, WITNESS said they were mostly flatbed trucks that had to be hand loaded. He said that was the reason for having to wear the respirators, that you were hand loading the drums and cans.

WITNESS said some of the cans and drums were full, others partially empty. He noted that the people at the SITE quickly buried the drums and cans when they were dumped. When asked if he knew the names of any of the Farboil employees he worked with, he said he did not.

WITNESS then described regularly picking up loads of trash from several Westinghouse facilities in the Baltimore area. At the facility in Hunt Valley, Cockeysville, he picked up regular trash as wells as computer parts and machine shop waste, including metal shavings. From a Westinghouse facility on Foster Avenue, he picked up similar trash, as well as cutting oil. From a facility near the Baltimore Washington Airport, he picked up the same types of materials, plus old navigation equipment. Trash from all three Westinghouse locations was dumped at both the 68 Street at and Sauer Lynhurst Road SITE. He noted the facility near the airport is now owned by "Norman -Viacom."

WITNESS also mentioned picking up trash at Fort Howard Hospital while he worked for Robertson, much of which was dumped at Sparrows Point landfill. But, he also dumped some of that at the Lynhurst Road SITE. It included red bags of medical waste with hypodermic needles.

WITNESS added that he regularly picked up glue, machine shop waste and chemicals from the Maryland Cup Company and Maryland Match Company facility on Eutaw Avenue. Much of that went to the 68th Street dump, but some was also taken to the Lynhurst Road. SITE.

WITNESS indicated that he is willing to cooperate and be interviewed again, if necessary.

I declare under penalty of perjury that the forgoing is true and correct.

Interview Summary

Name:

Affiliation:

Current Resident of 4226 Lynhurst Road Dundalk, MD 21222

Telephone:

(410-477-2386

Type of Interview:

In-Person

Date of Interview:

October 28, 2011

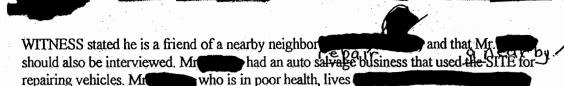

On October 28, 2011, the WITNESS was interviewed at his residence by Senior Investigator Dennis Walters. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary. The WITNESS was accompanied by his wife

The initial purpose of the interview as assigned was to simply confirm the welfare of the WITNESS. The WITNESS had been contacted by phone on the previous evening and agreed to a short visit.

The trip was combined with an effort to interview another previous interviewee (witness) who is a neighbor of this WITNESS.

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the Environmental Protection Agency for current residents.

The WITNESS had been interviewed several times in the past by Senior Investigator the last being on April 4, 2007. Although the interview was to be brief and focused on the well being of the WITNESS, both he and Mrs. were willing to be helpful, as they apparently had been in the past.

. He is quite independent and is often away from home for extended periods of time.

WITNESS was asked if he knew a phone contact number for Mr. and he advised Mr. only has a cell phone and that WITNESS does not know the number. WITNESS stated Mr. was known to use contacts to dispose of scrap auto parts in the SITE.

WITNESS then volunteered that Fritz Saucreceased) was a shrewd business man when it came to being able to figure out how to profit from salvage items brought to the SITE. For example, many people in the area deposited batteries from boats and other vehicles in the SITE. Fritz Sauer would strip the lead from the batteries to sell and bury the remainder of the battery carcass.

WITNESS also volunteered that much of the asphalt driveway in the SITE was placed there to cover toxic materials that had been dumped at the SITE. There is also a large storage shed on the SITE that was placed to cover up toxic materials that were dumped in the floor area of the storage shed. Much of that was used oil and hydraulic fluid from trash trucks owned by Mr. Sauer and others. That shed was capable of housing as many as five large vehicles.

WITNESS stated that much of the material brought to the SITE was from the local BFI facility. The Sauer's had an arrangement to remove certain materials from BFI trucks that BFI could not legitimately accept at the BFI site. He did not describe the particular materials.

WITNESS also volunteered that there was a lot of toxic material from the local Colgate-Palmolive factory. He stated (as is noted in previous interviews) that much of the toxic material, from the factory was dumped in the SITE when the factory was closed down. This included the wooden bricks from the factory floor that were soaked with compounds used in the soap making process. He said the wooden bricks were placed on the floor in a vertical position with the cut ends up so they absorbed more materials. When they had to be removed, the wooden bricks were pulled out with an ice pick and transported to the SITE to be dumped in large piles. WITNESS said when the wooden bricks were burned they made a very bright blue, red and yellow flame and had a very acrid odor. They made a lot of odorous smoke as they burned. WTINESS stated "all" trash from the local Colgate-Palmolive factory was disposed of at the SITE. Colgate Palmolive also dumped large quantities tin tooth paste holders at the SITE. WITNESS said he would take some of the tooth paste holders to extract the tin to make fishing weights which he sold to local fishermen. White and Red 55 gallon drums of residue were brought in from Colgate-Palmolive. He noted that the Colgate-Palmolive name was stamped on the bricks as well as the 55 gallon drums that were dumped at the SITE.

WITNESS noted that the same was true of 55 gallon drums of residue that had the name Valvoline stamped on them.

He also noted that when the Colgate-Palmolive plant was torn down, Fritz Sauer had the contract for disposal of the materials from the plant, and that included electrical transformers from Baltimore Gas and Electric Company that were dumped on the SITE.

When asked what he knew about local paint companies dumping at the SITE, WITNESS said the Farboil Paint Company was a large dumper of toxic paint material and residue. He said Fritz Sauer had a plastic lined chemical pond on the site and that much of the Farboil Paint Company materials were buried in the chemical pond, along with materials brought from the BFI facility.

WITNESS said that between 1978 and 1981, 55 gallon drums of waste from Farboil were brought to the site after 8: PM and were crushed and buried with a "Caterpiller" loader. He added that "lots" of one gallon paint cans from Farboil were also dumped at the SITE. He noted that the Sauer work crew always wore face masks when dealing with the Farboil materials being dumped. He said the Sauer crew did the same when they were handling materials being dumped from Colgate-Palmolive.

WITNESS then volunteered that between 1980 and 1984, was involved in the dumping that the SITE and that we should interview him, that he would have a lot of knowledge about what was being brought in. He said Mr had moved away from the neighborhood in the late 80's but is living somewhere in Hartford County, MD.

Mr. sis to be interviewed at his current known address.

When asked if WITNESS was familiar with Baltimore Copper Paint Company, he said he was expecting to be asked about them. He described the company as a "cloak and dagger" operation. He said the residue from Baltimore Paint Company was full of what he thought was Copper Sulfide used in bottom paint for boats to keep barnacles off the hulls. Both WITNESS and his wife commented that this paint was so toxic, the user had to be very careful not to breathe the fumes, or get the paint on his/her skin. It had to be painted on the hull of a boat and quickly placed in the water before it dried.

WITNESS stated he saw 55 gallon drums in blue, white and red brought in from Baltimore Copper Paint Company. He said every local marina sold bottom paint from Baltimore Copper Paint Company.

When asked if he was familiar with Cello Paint Company, WITNESS said he was not familiar with that firm.

WITNESS also volunteered that, if we are unable to contact Museum he will have a mutual friend, and an anotify him to contact me for an interview.

WITNESS expressed his willingness to be contacted further as necessary.

I did go to Mr. Sesidence, There was no response.

WITNESS expressed his willingness to be contacted further as necessary.

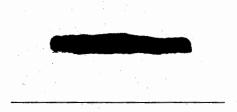

I did go to response.

The interview began at 11:30 AM and ended at 1:35 PM.

I declare under penalty of perjury that the forgoing is true and correct.

Date of Interview:

In-Person

October 28, 2011

On November 4, 2011, the WITNESS was re-interviewed at his residence by Senior Investigator Dennis Walters. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS and his wife that the had been interviewed on October 28, 2011, The WITNESS was, advised of the nature of the questions to be asked, and that the interview was voluntary. The WITNESS was again accompanied by his wife

In the interview of October 28, 2011, both the WITNESS and his wife had referred to dumping at the SITE by Colgate-Palmolive and that the dumping included toxic materials in 55 gallon drums, as well as wooden bricks from the factory floor that were stamped with the name "Colgate," He also described toothpaste holders that were dumped at the SITE and how he used the lead from those toothpaste holders for fishing weights.

Witness had referred to Colgate -Palmolive as a contributing dumper in interviews with Investigator in 2007.

In this interview, Witness was advised that there is no record of Colgate-Palmolive having had a facility in Baltimore, and was asked to describe the facility again. He confirmed that the building was just north of the Harbor Tunnel and could be seen on the right side of the Inner Harbor Throughway as you were driving north from the tunnel.

He described the building as being very long and having green window frames with the window glass covered over with white paint. He said it had a flat roof, except for an addition that had a peaked roof. There was a large parking lot in front of the building. There was a guard shack at the entrance with 24-hour security.

Witness and his wife both confirmed the clear presence of a large neon sign that read "Colgate." The lettering on the sign was similar to the design used by Colgate-Palmolive for product advertising.

Witness and his wife both advised that when you drove past the building, you could smell what appeared to be the fragrance of soap and that was one of the reasons they were certain it was a Colgate-Palmolive facility.

NOTE: The Colgate Hardware Company is currently headquartered at 6711 Holabird Avenue, Baltimore, MD 21222. This is a short distance from the facility location in question. The current business is listed as an electrical and lighting supplier. It is also known as the Colgate Group.

When presented with the likelihood that the facility in question was that of Colgate Hardware Company, and that it was known to have had a large sign on the roof, WITNESS and his wife both acknowledged that their long-time presumption may have been incorrect.

WITNESS acknowledge d that he was aware that there had been a Lever Brothers facility somewhere in that area, and that the soap fragrance may have been from that facility.

We then reviewed the information regarding dumping from that facility. WITNESS and his wife both confirmed that, no matter what the company was, the same materials had come from that facility as was reported previously. WITNESS stated that, when the facility was being closed down and gutted, Fritz Sauer had the contract and that the same wooden bricks, inscribed with "Colgate" on them were hauled from that building. Both reiterated the 55 gallon drums of toxic material were brought from the building and dumped at the SITE.

WITNESS referred to a former Sauer employee named "John" (last name unknown) who is now deceased was the principal driver who hauled the materials from the "Colgate" building to the SITE. During one or more conversations between WITNESS and "John" about the "Colgate" building and what was being brought to the SITE, "John" cautioned not to talk about it because people involved in the removal from the "Colgate" facility and dumping at the SITE could go to jail.

WITNESS said John had told him the tow motors in the facility leaked hydraulic fluid on the floors and that was part of the contaminating content of the wooden bricks. He said many of the bricks were sold to local residents for fire wood, and that they complained about the black acrid smoke they made. He said there were enough of these bricks that new ones were brought in to the "Colgate" facility in train cars. The piles at the SITE were as much as twenty feet high.

WITNESS reiterated what he had said in the previous interview on October 28, 2011, that those who were unloading the materials from the "Colgate" building site wore face masks and told WITNESS not to be close to any of the fumes from the materials.

WITNESS also remembered a conversation with John who had mentioned that a part "which he thought could have been from a military tank", produced or stored at the "Colgate" facility were dumped at the SITE. He acknowledged that this would be more consistent with a hardware company than a soap products manufacturer.

He also noted that, when Fritz Sauer was dismantling the building, he (WITNESS) had asked if he could tour it out of curiosity. He was told not to because of the size of the building and his limited ability to walk long distances with his back problems.

He said aluminum wall panels from interior walls were also dismantled from the "Colgate" building were carried to the SITE.

WITNESS and his wife both noted that many of the 55 gallon drums from the "Colgate" facility were eventually cleaned and used in the neighborhood for burn barrels and that the WITNESS used some of them for storage containers on the pier behind his residence.

remembered having photographs of a particular type of barrel, from the "Colgate facility that were red with white stripes on them. She had taken a photograph of a neighbor's yard two houses away (to the north) and that several of these barrels were in the photograph.

When asked if it would be possible to see that photograph, WITNESS's wife located it and made a scanned copy, which is attached to this report.

In the October 28, 2011 interview, WITNESS stated that large numbers of "Colgate toothpaste like tubes made of tin" were also dumped at the SITE, and that he used some of them to use the content to make fishing weights.

WITNESS was shown several photographs of Colgate toothpowder tins and asked if the ones being dumped were similar. He said they were not and that the ones being dumped were actually the old type to toothpaste tubes that were made of tin so they could be rolled up as the contents were squeezed out.

When asked if they specifically said "Colgate" on them, WITNESS acknowledged that they had plain paper covers with no names on them, He acknowledged that, since they believed the tubes came from a local "Colgate" factory, they believed the tubes were from Colgate-Palmolive. When asked if they could possibly have come from a Lever Brothers facility, WITNESS agreed they could have.

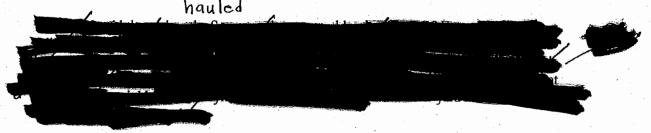

WINESS described in detail how he would cut the tubes diagonally in strips to put them in pots to melt down so the tin could be extracted.

In his October 28, 2011 statement, WITNESS explained how electrical transformers and other BG&E parts were brought in at the time the "Colgate" Building was being dismantled. When asked if he was sure the transformers actually came from the "Colgate" facility, he agreed that they could have come from other locations, but they arrived at the same time the "Colgate" facility was being dismantled.

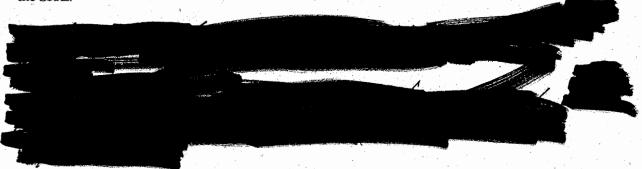

When asked if BG&E transformers and other electrical materials from BG&E could have been brought from other locations, he stated "absolutely." They were 440 volt transformers. He then explained that Sauer's would collect BG&E transformers and other electrical debris

from "all around the area," He said the transformers were full of an acid he referred to as "chemical goo" and that Fritz Sauer would take them apart for what lead they had in them. John, the deceased driver, did all of the collecting of BG&E transformers and other parts.

WITNESS added that he remembers BG&E trucks bringing 60 foot long poles to the site and that he (WINESS) would help cut the poles in half. Then they were used for local pier pilings or dumped at the site. They had to be cut before the BG&E trucks could get turned around in the SITE.

WITNESS added that, if any company was responsible for the toxic waste at the SITE and should be held accountable, it was BG&E. He said BG&E had auditing procedures to account for all waste it removed from the area, but that the work crews disregarded the procedures.

He also noted that when Fritz Sauer or another employ were working on BG&E transformers at the SITE, they wore face masks and told WITNESS to stay away.

WITNESS was asked whether he knew of any waste from the old McCormick Spice Factory at Inner Harbor being dumped the SITE. He said Fritz Sauer did have the contract to gut the old McCormick facility, but that the (WITNESS) was not aware of any dumping from McCormick at the SITE. He said the Monument Street dump was closer to the McCormick factory and any debris from McCormick would likely have gone there.

WITNESS reviewed the October 28, 2011 interview and made several changes that are noted in the final version. He was adamant that, while Farboil Paint Company was a dumper at the SITE, he feels strongly that Farboil did not know its' waste was being improperly discarded. He believes Farboil ran its business well and would not have knowingly contributed to the improper dumping.

WITNESS also corrected an error in the October 28, 2011 statement with regard to a pond used by Fritz Sauer to dump toxic waste. That pond was at the BFI facility, not the SITE.

Sauer was partially responsible for what was dumped in that pond, but it was on BFI property. (See page 4, paragraph 2 of the October 28, 2011 statement,)

dvised they have not seen WITNESS and bund the neighborhood lately and believe he may be on the Eastern Shore for some reason. They said he drives a late model black pickup truck that has not been at the house. The pickup truck was not at the house when I stopped at 2:44 p.m.

WITNESS reiterated his willingness to be contacted further as necessary. The interview began at 12: 05 p.m. and ended at 2:35 p.m.

I declare under penalty of perjury that the forgoing is true and correct. is my Recollection, about 30,+years). I ful their a Ture & accurate reflection to EPA's agent Dennis Watters. You. 19, 2011

December 2, 2011

On December 2, 2011, a follow up visit was conducted with the WITNESS and his wife. The purpose was to attempt to determine the positive identify of the building that has been previously described as both the "Colgate-Palmolive Building" and the "Colgate Building." This building was the site of the gathering of debris that had been dumped at the SITE, including wooden bricks that contained the stamped identifier "Colgate."

What the witness had originally identified as the Colgate-Palmolive Building when he was interviewed by investigator on April 4, 2007, and subsequently to Investigator Dennis Walters on October 28, 2011, we had determined in a November 4, 2011 re-interview may have been the Colgate Hardware Company Building. As of December 2, 2011, the building had not actually been located and may not even exist any longer.

On December 2, 2011, the WITNESS was re-interviewed at his residence by Senior Investigator Dennis Walters. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS and his wife that had been interviewed on October 28, 2011, and November 4, 2011, The WITNESS was advised of the nature of the questions to be asked, and that the interview was voluntary. The WITNESS was again accompanied by his wife

Prior to this visit, arrangements had been made for the WITNESSS to accompany Investigator Dennis Walters to the location where he used to see this building from the old Harbor Tunnel Thruway. We drove to the area via Holabird Avenue to a point where we were directly adjacent to the Thruway, which is now part of Interstate Highway 895. A map of the location is attached to this report as Addendum A.

When we arrived at 5300 Holabird Avenue, the WITNESS indentified the building. It generally matched the description he had given in previous statements, except that it didn't have a peaked roof addition as he had described.

We viewed the building from all possible directions and the WITNESS was confident that this was the building that used to have the Colgate sig n on the roof, and that it was the one he

described as being the source of the wooden brinks, 55 gallon drums, metal wall panels and other debris that had been deposited at the SITE in the early to m id 1980s.

When the arrangements had been made to look for this building the same initiated her own effort o identify the building and find a photograph that would positively show the "Colgate" sign on the roof. She had contacted the Central Branch of the Pratt Library and was led to the branch of the library known as the Baltimore Museum of History.

Baltimore Gas and Electric Company had donated to the Museum. Shought there might be a photograph in the collection that showed the Colgate sign on top of the Lever Brothers building. A subsequent search by the roved negative, but they did find other historical data about the building.

had also talked with the Dundalk Historical Society. He remembered the sign but had a different interpretation of its significance. He believed the sign depicted the fact that the building was in the Colgate neighborhood of the city. He also suggested that the reason the wooden bricks were identified as "Colgate" was that they came from the Lever Brothers "Colgate" plant.

had also contacted the building but the Dundalk Eagle newspaper. They had no information on the Lever Brothers building but have extensive files on the closure of the BFI facility in Dundalk.

The building was constructed in 1926 by the Gold Dust Corporation, a manufacturer of soap products. Gold Dust changed it s name to Hecker Corporation prior to selling the building. It was acquired by the Lever Brothers Corporation in 1939, and was owned by Lever Brothers at the time of the removal of debris to the SITE in the 1980s. An employee of the current owners, Sun Products Corporation who was getting out of his car in the employee parking lot at the time we were surveying the location, said the building was acquired from Lever Brothers "about five years ago" (2006).

During the discussions with both of the confirm when the SITE was officially closed. They reported that it officially closed somewhere around 1983-4. However, Fritz Sauer and others continued to accept loads of debris in the evening hours and did some of their stripping of saleable materials from the trash that was brought onto the SITE until Fritz Sauer passed away in 1990.

A preliminary check of Baltimore County death record shows that there are six death records for the name Fritz Sauer.

During the December 2, 2011 visit, the WITNESS was also asked if he could identify within the SITE where certain materials were dumped and covered over. He explained that the majority of the SITE was originally covered with water from Back River, a tributary of the Chesapeake Bay. As the dump SITE was developed, the deposits were continually backfilled to the point where the water line was pushed back to approximately its present location.

The WITNESS drew numbers on a copy of an aerial view of the SITE, which is attached. The numbers correspond with where certain types of debris were deposited and buried. A copy of the map is also included on which the numbers have been highlighted to facilitate easier reading. The original prepared by the WITNESS is attached as Addendum B, the copy as Addendum C.

Also during this interview, the WITNESS was asked what other facilities were in the neighborhood that might have dumped waste at the SITE. This was an exploratory question to determine if the WITNESS would recall Western Electric as a possible generator mentioned that there was a Western Electric facility in the area. The name of Western Electric had not been provided. WITNESS refuted her by stating that the only Western Electric facility in the area he was aware of were office spaces in several area buildings, that there was no manufacturing by Western Electric. A copy of an article from an unknown magazine article that was given to be a staff at the Baltimore Museum of Industry names Western Electric as having made telephone switchboards and other communications equipment in a nearby facility. That article is attached as Addendum D.

On November 4, 2011, the WITNESS had said the state of the ather had invented the telephone jack that is currently in production while working at a Western Electric facility in the area.

Photographs of the building are attached as Addendums E, Fand G. An additional photo from page 31 of the *Images of America-Dundalk* book by Gary Helton, published in 2005 is attached as Addendum H.

A picture of the building when its refurbishing was finished in 1986 is attached as Addendum I. This would coincide with the removal of the debris that was dumped at the SITE.

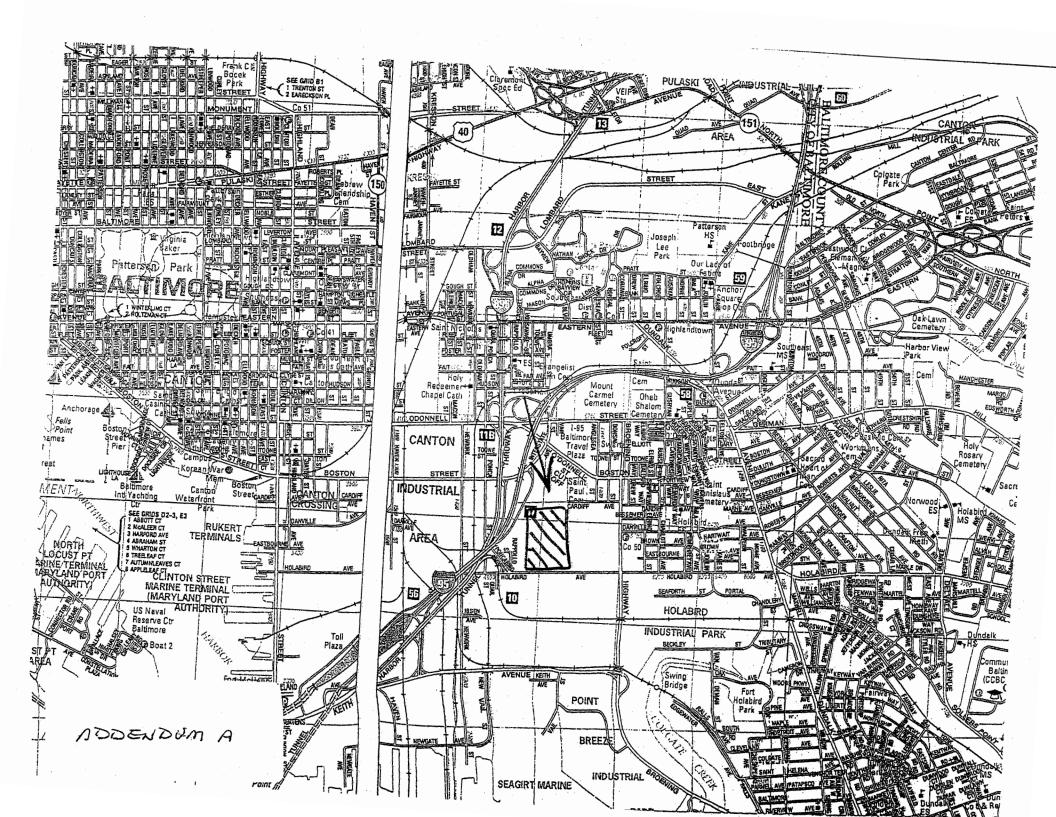

In the November 4, 2011 interview that had provided a scanned copy of a photograph of red and white 55 gallon drums that had been brought to the SITE from this location. When photographed, the barrels were in a neighbor's yard. The photograph did not scan well and the true colors of the barrels were difficult to identify. On this visit, Martha agreed to loan the original photograph to the EPA. It will be mailed with the original documents in this report. In the photo, there appears to be a label near the bottom of the barrel on the left, but it is undistinguishable. There may also be lettering in a dome-shaped band that goes through the white center portion of the barrel.

WITNESS again reiterated his willingness to be contacted further as necessary. The field site visit and interview began at 10:00 a.m., and ended at 3:20 p.m.

I declare under penalty of perjury that the forgoing is true and correct.

Type of Interview:

In-Person

Date of Interview:

December 16, 2011

On December 16, 2011, the WITNESS was interviewed at his residence by Senior Investigator Dennis Walters of Chenega Global Services, LLC. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary.

The WITNESS had been interviewed on July 5, 2005 by Investigator
This was a follow up interview to attempt to gain further information regarding possible generators at the SITE.

I interviewed the WITNESS in the presence of his daughter. The WITNESS is 95 years of age and has extreme hearing deficiency.

The Interview by Investigatol was reviewed with the WITNESS. On this occasion, he could not recall the names of any of the companies noted in the previous interview. He did recall paint cans being dumped, but not the name of the generators.

He did describe in detail the dumping of large numbers of 12 ounce cans of beer on a regular basis. However, in the July 5, 2005 interview he identified them as the National Brewing Company or Gunther Brewing Company. Now, both he and his daughter said they believe it was actually Schaeffer Brewing Company.

WITNESS said the beer was distributed to any local resident who wanted to collect it.
WITNESS would take a wheelbarrow to the rear of Fritz Sauer's house at the entrance to the
SITE to collect the beer. He said he never got any further into the SITE.

WITNESS stated that where his house was located around the curve in Lynhurst Road from the entrance to the SITE, he could not see what trucks were going in and out of the SITE. His daughter greed. WITNESS stated that someone had been digging up materials that were buried at the SITE near the boundary to his property. He looked at an aerial view and described the area where his property adjoined the Sauer Dump. He didn't know who was

digging up the materials, but he erected a fence along the edge of his property to delineate it from the SITE.

WITNESS's grandson now lives in the house he still owns at stated her son, as too young to remember any details about dumping at the SITE.

WITNESS also said a railroad siding came up close to the Sauer Dump at one time, and that he thought the land might have actually belonged to the railroad. He couldn't recall what railroad it was.

WITNESS volunteered that there was a social culture among those who lived near the SITE that "everyone took care of everyone else." No one cared whether the dumping was legal. There was a social club house near the entrance to the site at one time and the members all covered for each other.

When asked if the WITNESS could remember the names of anyone who was part of the social community who might have knowledge of the SITE, he said the best person to talk with would be whom we have already interviewed. He said the pend a lot of time hanging around the SITE because

WITNESS also suggested talking to (last name unknown) who was a renter in the Sauer owned house at the entrance to the SITE. I had learned previously that is no longer the renter in that house.

WITNESS stated that he is retired from the Baltimore City Fire Department and that everyone in the Fire Department knew Fritz Sauer. He said the Sauers were always in trouble with the city at their other dump site at 68th Street. He said he didn't know if that ever happened that the Lynhurst Road SITE.

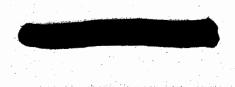

Note: A check of records with Baltimore County Fire Department may be useful if it has not already been done.

WITNESS offered to be contacted again if need, but had no further information to provide.

The interview began at 11:00 am and was completed at 11:50 am.

Respectfully submitted by Dennis H. Walters.

Former Resident of

Telephone: Type of Interview: None Known In-Person

Date of Interview:

December 16, 2011

On December 16, 2011, the WITNESS was interviewed at his residence by Senior Investigator Dennis Walters of Chenega Global Services, LLC. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary.

The WITNESS had been interviewed on March 20, 2007 by Investigator This was a follow up interview to attempt to gain further information regarding possible generators at the SITE.

When I arrived at the rear driveway of the WITNESS's residence, he emerged from the house with only socks on his feet and met me on the rear deck. When I introduced myself and offered a copy of the EPA Letter of Introduction, the WITNESS refused to accept it. When I asked if we could speak about the SITE, he abruptly said that he was not ever going to talk about the SITE with anyone again. He said he knows nothing about the dumping there or what was actually dumped.

When I encourage him to at least go over the list of companies with me to see if he might be able to recall any trucks, he said "no." He then volunteered that the only thing he remembers ever seeing at the SITE was piles of sawdust that had been brought by local tree trimmers.

I attempted to expand on that comment by asking if he could tell me where in the SITE the piles of sawdust were dumped. The WITNESS shook my hand and said that was all he was going to say. He then turned away and walked back into the house.

It was obvious from the expression on the WITNESS's face and eyes, that he was being angered by the attempt to continue the conversation.

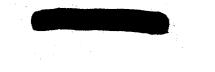

I left the property.

The March 27, 2007 interview by Investigator hows that the WITNESS did have valuable knowledge of the SITE and the dumping. It is not likely that he will be cooperative at any future time.

I was told by recently interviewed that the WITNESS had pulled a gun on her in the past when she asked questions about the SITE. The remote location of the WITNESS's home and his demeanor suggest that future efforts to interview him might be best accomplished in a more formal setting.

Respectfully submitted by Dennis H. Walters.

The WITNESS was interviewed as part of the Senior Investigator, of Potentially Responsible Party search currently being conducted under Task 0001, Site 005, the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary. No other persons were present, and this interview was not tape recorded.

The WITNESS was asked questions based on guidelines provided by the USEPA for Government employees.

The WITNESS stated that he was employed by the Baltimore County Department of Health and Environmental Services from 1983 to 1987 and then with the Baltimore County Air Quality Division until 1993.

The WITNESS stated that he was friends with who lived on Lynhurst Road and the WITNESS stated that he visited often.

The WITNESS stated that he would inspect American Yeast which was located on Beechwood Drive close to the Sauer Dump. The WITNESS stated that he inspected American Yeast for air releases and was not involved in the disposal of any waste.

The WITNESS stated that he did recall American Yeast disposing of metal waste but was unable to be any more specific.

When asked if he recalled any open burning on Sauer Dump, the WITNESS stated that he did recall some open burning when he was visiting. The WITNESS stated that he was in the Air Quality Division and the Baltimore County Division of Environmental Protection would respond.

When asked the names of the individuals from the Baltimore County Division of Environmental Protection who would respond to the Sauer Dump, the WITNESS provided the following:

The WITNESS stated that both of the above individuals are currently employed by

The WITNESS stated that the only other burning or accumulation that may have been disposed of at the Sauer Dump were metal shavings that were accumulated at the Bethlehem Steel Plant at Sparrows Point.

The WITNESS stated that Bethlehem Steel hired a company to burn scrap metal on site at the Plant. The WITNESS stated that the burning of this metal generated metal shavings that had the appearance of metal silica. The WITNESS stated that this substance was known as Kish.

The WITNESS stated that in approximately 1987 Bethlehem Steel was directed by the Baltimore County Division of Environmental Protection to remove the substance from the property. The WITNESS stated that he does not know the name of the company who removed the Kish.

The WITNESS was shown the list of PRPs and asked if he had any knowledge of these companies disposing of waste at the Sauer Dump.

The WITNESS declined to review this list stating that he had no further knowledge of the Sauer Dump and reviewing this list would not be helpful.

"I declare under p	enalty of perjury that th	e foregoing is true	and correct."

Interviewer's Comments and Suggested Follow-up Interviews

<u>Interviewer Comments:</u> The WITNESS was cooperative; however, he was very reluctant to review the PRP list because he is aware of the companies' air quality deficiencies.

The WITNESS agreed to sign a copy of the interview summary.

Date of Interview:

October 26, 2010

On October 26, 2010 the WITNESS was interviewed at his place of business at by Senior Investigator, of The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001, Site 005 the Sauer Dump (the "Site"). The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked, and that the interview was voluntary. No other persons were present, and this interview was not tape recorded.

The building had no signs indicating the name of the business. The Interviewer drove to the back yard of the building and observed a truck driver wearing a hard hat with the name and a jacket with the name printed on the pocket. The Interviewer asked this driver the name of the Company that occupied the building and the name of the Company that he works for. The driver stated that this company name is

The Interviewer entered the building and met with the WITNESS. After identifying myself, the WITNESS directed me to a conference room located in the building.

At this time I reiterated the purpose of my visit and asked the WITNESS the name of the Company.

The WITNESS initially stated that he is employed by which had recently been sold by When asked the names of these companies, the WITNESS initially evaded the question. When asked the name of the company that issues his pay check the WITNESS stated that he never sees his pay check.

During my attempt to determine the name of his employer the WITNESS offered information about some of his knowledge of the Sauer Dump.

The WITNESS stated that from approximately 1984 to 1988 he was employed by salesman.

The WITNESS stated that he often followed salesmen from waste transporters to identify where they were soliciting business. The WITNESS stated that he recalled one evening he was following a competitor's trash truck from a large company and noticed that this trash truck was not traveling to a known landfill.

The WITNESS stated that he followed the truck to the Sauer Dump and waited for the truck to dispose of the waste. The WITNESS stated that he recognized the waste and knows where the waste was picked up.

The WITNESS stated that after the trash truck left the dump the WITNESS entered the Sauer Dump and observed the waste on the top of the ground. The WITNESS stated that he also observed a crane with a dragline and explained that the dragline was used to dig and fill holes.

The WITNESS stated that he reported this incident to the Baltimore County Department of Environmental Protection.

When asked the name of the waste transporter and the generator, the WITNESS stated that he would have to check with the lawyers at When I asked if he is employed by the WITNESS stated that we is one of the affiliates.

At this time I advised the WITNESS that I could no longer talk to him and advised that I would notify the USEPA about our discussion.

Interview Summary XXXXXXXXXX

Name:

("WITNESS")

Affiliation:

Former Resident/Lynhurst Road, Dundalk, MD

Telephone:

XXXXXX

Type of Interview:

In Person

Date of Interview:

December 13, 2006

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the United States Environmental Protection Agency for former residents.

The WITNESS was shown an aerial photograph of the Site. This aerial photograph was used as a reference throughout the interview. The aerial photograph used during this interview will be forwarded under separate cover.

The WITNESS was asked to explain his association with the Sauer Dump located off Lynhurst Road in Dundalk, Maryland.

The WITNESS stated that he lived in the house at Lynhurst Road from 19XX to 19XX. The WITNESS stated that he lived at this residence with his family until he was fourteen years old.

The WITNESS stated that

The WITNESS stated that

on numerous occasions he assisted XXXXX with unloading the slag and burned sand and using these materials to fill in the swamp area in the rear of the house. The WITNESS stated that he had accompanied XXXXXX to the American Standard plant and had assisted in loading the pick-up truck with this slag and burned sand.

When asked to describe the burned sand and slag, the WITNESS described the slag as large boulder shaped glass or marble looking objects. The WITNESS said the sand looked as though it had been burned and was brown in color.

When asked if he knew why this sand was burned, the WITNESS stated that he had been told XXXXXX the sand was used as part of the casting process in forming the molds at the American Standard plant. The WITNESS stated these molds were formed by using a cooking process. The WITNESS had no further knowledge of this casting process.

When asked to describe this waste, the WITNESS stated that he observed numerous truckloads of plasterboard dumped at the swamp area behind the XXXXX house. The WITNESS stated that the plasterboard was from the National Gypsum Company. When asked to explain how he knows where this plasterboard had been generated, the WITNESS stated that some of the plasterboard had the name "National Gypsum" stenciled on it.

The WITNESS stated that he observed numerous dump trucks disposing of shingles and tar buckets in the swamp area in the rear of the XXXXXX house. The WITNESS stated that he had observed these dump trucks picking up shingles from the shingle manufacturing plant located on Ponca Street in Baltimore.

The WITNESS stated that he recalls numerous flat-bed trucks dump old engine and motor batteries at the same location in the rear of the XXXXXX house. The WITNESS stated that some of these batteries resembled those used on forklift trucks. The WITNESS stated that he recalls the name Robb Tyler stenciled on the cab doors of the trucks dumping these batteries at the Site.

The WITNESS stated that he observed numerous 55-gallon steel drums dumped at the Site. The WITNESS could not recall the names on the trucks that dumped these drums. The WITNESS stated that he does not recall if any of these drums had names on them.

The WITNESS stated that he is unable to be more specific about how many times each truck dumped waste in the swampy area of the Site. The WITNESS explained that he observed the dumping after school and on weekends.

The WITNESS stated that his mother sold the house at XXXXX Lynhurst Road to XXXXXXX in 19XX.

When asked the names of other individuals who may have knowledge of disposal activities at the Site, the WITNESS provided then following:

XXXXXXXXXX.

The WITNESS was shown a list of the following companies and asked if he had any knowledge of any of these companies disposing of waste at the Sauer Dump.

Type of Interview:

In-Person

Date of Interview:

December 18, 2006

On December 18, 2006, the WITNESS was interviewed at her residence by XXXXXXXXXXXX, Senior Investigator, of XXXXXXXXX. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001 Site 7 involving the Sauer Dump in Dundalk, Maryland (the "Site.") The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked and that the interview was voluntary. The WITNESS stated that she is not represented by an attorney in this matter and does not want an attorney. No other persons were present during this interview, and the interview was not tape-recorded.

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the United States Environmental Protection Agency for current residents.

The WITNESS was shown an aerial photograph of the Site. This aerial photograph was used as a reference throughout the interview. The aerial photograph used during this interview will be forwarded under separate cover.

The WITNESS was asked to explain her association with the Sauer Dump located off Lynhurst Road in Dundalk, Maryland.

The WITNESS stated that she has lived at XXXXX Lynhurst Road since 19XX. The WITNESS stated that

The WITNESS stated that she had observed numerous trucks going in and out of the Sauer Dump. The WITNESS stated that these trucks entered the Sauer Dump at an entrance located next to Fritz Sauer's residence at 4227 Lynhurst Road.

When asked to describe these trucks, the WITNESS stated that she recalls numerous dump trucks and flat-bed trucks entering the Sauer Dump. The WITNESS stated that she does not recall any names or letters on any of the trucks. The WITNESS stated that many of the flat-bed trucks had black tarp covering the bed of the truck. The WITNESS stated that this black covering was elevated and appeared to be covering items on the bed of the trucks.

The WITNESS stated that she does not know what was dumped at the Sauer Dump. The WITNESS stated that she complained to Fritz Sauer many times about the truck traffic. The WITNESS stated that Fritz Sauer always promised to keep the truck traffic to a minimum but never did.

The WITNESS stated that dumping on the Sauer Dump occurred at all hours of the day, including at night. The WITNESS stated that Fritz Sauer operated a bulldozer on the dump, which she could hear crushing waste. The WITNESS stated that she complained to Fritz Sauer about this noise. She stated that Fritz Sauer told her he was "crushing stuff for fill."

The WITNESS stated that dumping at the Sauer Dump continued until shortly before the death of Fritz Sauer in approximately 1991.

When asked if she had any knowledge of the types of waste that was dumped on the Sauer Dump, the WITNESS stated that she did not have any knowledge about the types of waste because she never actually observed the dumping.

When asked the names of any individuals that worked on the Sauer Dump, the WITNESS stated that most of the Sauer brothers worked on the dump at one time or another. The WITNESS could not provide any first names of the Sauer brothers.

The WITNESS stated that Fritz Sauer also employed other individuals to work on the Sauer Dump, but she was unable to provide any names.

The WITNESS was provided with a list of the following companies and asked if she had any knowledge of waste disposal by these firms at the Sauer Dump located off of Lynhurst Road. The WITNESS viewed this list and indicated that she could not recall any specific companies.

Type of Interview:

Telephone

Date of Interview:

December 12, 2006

On December 12, 2006, the WITNESS was interviewed by telephone by XXXXXXXXXXX, Senior Investigator, of XXXXXXXXXX. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001 Site 7 involving the Sauer Dump in Dundalk, Maryland (the "Site.") The WITNESS was advised of the nature of the questions to be asked and that the interview was voluntary. The WITNESS stated that he is not represented by an attorney in this matter and does not want an attorney. No other persons were present during this interview, and the interview was not tape-recorded.

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the United States Environmental Protection Agency for former residents.

The WITNESS was told the location of the area that is known as the Sauer Dump. The WITNESS was advised that the Sauer Dump located off of Lynhurst Road includes the area located behind the residence of XXXXX Lynhurst Road.

When asked to describe the residence at XXXXX Lynhurst Road, the WITNESS described the residence as a three bedroom wood frame house. The WITNESS stated that the rear of the house consisted of a large marsh like area. The WITNESS stated that XXXXXXXX had purchased the house at XXXXX Lynhurst Road and the back lot in approximately XXXXX. The WITNESS stated that he does not know from whom XXXX purchased the property. When asked the size of the lot that XXXX purchased, the WITNESS stated that he does not know.

The WITNESS stated that in approximately 19XX, he was XXXXX years old and XXXX was employed as a yard worker by American Standard (also known as American Standard Radiators) which was located on Halibird Avenue in Baltimore, Maryland. The WITNESS stated that every weekend from 1958 to 1961, XXXXX picked up one to two pick-up truck loads of a material he referred to as slag from the yard at American Standard. The WITNESS explained that XXXXX would usually make one trip with this slag from American Standard.

The WITNESS stated that XXXXX would bring in two to three pick-up truck loads of the slag on one weekend if he had enough money for gas.

When asked to describe the slag that XXXXX dumped at the marsh area located behind the residence at XXXX Lynhurst Road, the WITNESS stated that the slag looked like a glass or blocks of marble. The WITNESS stated that the slag was gray and black in color. The WITNESS stated that the slag came in chunks, like boulders.

The WITNESS stated that XXXXX dumped the slag behind the residence in order to fill in the marshy area. When asked how far back from the house XXXXX filled in, the WITNESS stated approximately 200 yards.

When asked if XXXXXX dumped any other substance on the property located behind the residence at XXXX Lynhurst Road, the WITNESS stated that occasionally XXXXX got a pick-up truck load of manure from the Baltimore City treatment plant. Then WITNESS stated that XXXXXXXX this manure on the lot behind the house as fertilizer. When asked where the waste treatment plant was located, the WITNESS stated that he does not know.

When asked if he was aware of XXXXX dumping any other substance on the Sauer Dump located off of Lynhurst road, the WITNESS stated "no."

When asked the names of any other individuals who may have relevant knowledge of dumping activities in the area behind his residence at XXXX Lynhurst Road, the WITNESS provided the names of XXXXXXXXXX:

- XXXXXXXX
- XXXXXXXX
- XXXXXXXXXX

The WITNESS was read the names of the following companies and asked if he had any knowledge of any of these companies disposing of waste at the Sauer Dump. The WITNESS stated that he had no knowledge of any of the companies except American Standard disposing of waste at the Sauer Dump or the area located behind the residence at XXXX Lynhurst Road.

Type of Interview:

In-Person

Date of Interview:

November 25, 2006

On November 25, 2006 the WITNESS was interviewed at his residence by XXXX XXXXXX, Senior Investigator, of XXXXXXXX. The WITNESS was interviewed as part of the Potentially Responsible Party search currently being conducted under Task 0001 Site 7 involving the Sauer Dump and Task 0001 Site 8 involving 68th Street in Dundalk, Maryland (the "Site.") The WITNESS was provided with a copy of the letter of introduction, advised of the nature of the questions to be asked and that the interview was voluntary. The WITNESS stated that he is not represented by an attorney in this matter and does not want an attorney. No other persons were present during this interview, and the interview was not tape-recorded.

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the United States Environmental Protection Agency for current owner/operators.

The WITNESS was shown an aerial photograph of the Site at the Sauer Dump located off Lynhurst Road and an aerial photograph of the Site at the 68th Street Dump. These aerial photographs were used as a reference throughout the interview. The aerial photographs used during this interview will be forwarded under separate cover.

The WITNESS stated that XXXXXXX also operated a junk yard at XXXXXXXX and XXXXXXXX in Baltimore. The WITNESS stated that this junk yard was used a scrap metal yard. The WITNESS stated that XXXXXXXX would chop up old vehicles and sell the metal scrap to a scrap iron operator.

When asked the name of the scrap iron operator to whom XXXXXXX sold the scrap metal, the WITNESS provided the following:

When asked if XXXXXXX provided towing service for any waste transport companies the WITNESS stated "yes" and provided the names of the following waste companies:

Robb Tyler: The WITNESS stated that XXXXXXXX towed trash trucks owned and operated by Robb Tyler frequently in the 1960s. The WITNESS stated that he rode XXXXXXXX on tow trucks on numerous occasions and recalls picking up Robb Tyler trucks throughout Baltimore City and County. The WITNESS stated that he recalls towing these trash trucks to the Robb Tyler Garage located off 68th Street in Baltimore, Maryland. The WITNESS stated that he recalls towing trucks to the Sauer Dump located off Lynhurst Road on a few occasions.

When asked if he ever observed waste disposal activities at the Sauer Dump, the WITNESS stated "no." The WITNESS stated that he was only approximately sixteen years old at the time and does not recall any specifics about the Sauer Dump.

When asked if he observed any waste disposal activities at the 68th Street Dump, the WITNESS stated "no." The WITNESS stated that he recalls observing numerous trucks dispose of waste on the landfill but could not recall anything specific about the waste.

When asked if XXXXXXXXX ever transported waste, the WITNESS stated not to his knowledge.

When asked the names of employees of XXXXXXXXXX, the WITNESS stated that he can only recall one individual and provided the following:

XXXXXXXXXX.

When asked if XXXXXXXXXXX was still living, the WITNESS stated that XXXXXX is extremely ill XXXXXXXX and cannot be bothered.

When asked if XXXXXXXXXXXXX transports waste, the WITNESS stated "no." The WITNESS explained that he operates ten flat bed trucks and transports products from factories to retail locations.

When asked the names of his customers, the WITNESS stated that he was reluctant to name his customers. The WITNESS did provide the following:

- Harmans Metal
- Hanson Pipe
- Bethlehem Steel.

The WITNESS stated that he transports windows and pipes for these companies.

When asked if he knew any of the XXXXXX family members, the WITNESS stated that in approximately 198X he was employed by Cambridge Scrap Iron and Metal (Cambridge). The WITNESS stated that he was employed by Cambridge for approximately six months. The WITNESS stated that XXXXXXXXXXXX worked at Cambridge at the same time. The WITNESS stated that XXXXXXXXX operated the crane at the Cambridge yard.

When asked to describe his job at Cambridge, the WITNESS stated that he drove a roll off truck while employed by Cambridge. The WITNESS stated that Cambridge placed 40-cubic yard containers at numerous industrial locations in the Baltimore area. The WITNESS stated that Cambridge had contracts with these industrial plants to pay for the contents of the Cambridge containers. The WITNESS stated that the containers were only allowed to hold scrap metal.

When asked the names of industrial locations that he picked up full Cambridge containers, the WITNESS provided the following:

Bethlehem Steel.

The WITNESS stated that he picked up containers from numerous other locations, but he could not recall the names of any other locations.

When asked if he ever picked up Cambridge containers from Boston Metal, the WITNESS stated that he does not recall.

When asked if he knew Fritz Sauer, the WITNESS stated that he does not recall ever meeting Fritz Sauer but does recall the name. When asked if he recalls Fritz Sauer bringing scrap metal to Cambridge, the WITNESS stated that he does not recall. When asked if he recalls Fritz Sauer obtaining fill dirt from the Cambridge yard, the WITNESS stated that he does not know.

The WITNESS was provided with a list of the following companies and asked if he had any knowledge of waste disposal by these firms at either the Sauer Dump located off Lynhurst Road or the 68th Street Dump. The WITNESS had some knowledge of these firms, but he denied ever disposing of waste from these firms at either the 68th Street Dump or the Sauer Dump. Companies of which he had knowledge have comments next to their name.

Name: XXXXXXXX ("WITNESS")

XXXXXXXXX XXXXXXXXX

Affiliation: Former Employee and Area Resident

Telephone: XXXXXXXXX (Cell Phone)

Type of Interview: In-Person

Date of Interview: October 28, 2006

During the course of this interview, the WITNESS responded to questions based on guidelines provided by the United States Environmental Protection Agency for area residents/former employees.

The WITNESS was shown an aerial photograph of the Site. This aerial photograph was used as a reference throughout the interview. The aerial photograph used during this interview will be forwarded under separate cover.

The WITNESS was asked to explain his association with Fritz Sauer and the Sauer Dump located adjacent to Lynhurst Road in Dundalk, Maryland.

The WITNESS reiterated that he grew up living at XXXXXXXX Road, and he was employed by Fritz Sauer from 197X to 197X. The WITNESS stated that he was employed by Robb Tyler/BFI from 1973 to approximately 197X.

The WITNESS stated that

The WITNESS explained that Fritz Sauer operated a truck repair shop at the Site, and Fritz Sauer repaired trucks for Robb Tyler.

The WITNESS was asked if Fritz Sauer scraped out any waste when the WITNESS worked at the K & N location. The WITNESS stated that Fritz Sauer occasionally would pick through waste that was brought to the K & N location from Western Electric. The WITNESS stated that Fritz Sauer would pick out copper and aluminum from this waste. The WITNESS stated that Fritz Sauer transported the copper and aluminum back to the Site located off Lynhurst Road.

When asked how he knew that this waste was from Western Electric, the WITNESS stated that he was told by one of the drivers. The WITNESS stated that he does not recall the name of the driver. The WITNESS stated that he does not know how often waste from Western Electric was disposed at the K & N location.

When asked the names of the waste transport companies that disposed of waste at the K & N location, the WITNESS provided the following:

- Robb Tyler
- Modern Trash: When asked if this was Modern Trash Moval, the WITNESS stated "yes."
- Cross: The WITNESS stated that he does not know the complete name of Cross.

When asked the names of any of the drivers of the above waste transporters, the WITNESS stated that he does not recall any names.

When asked the names of other generators that had waste disposed at the K&N location the WITNESS provided the following:

- General Motors Corporation: The WITNESS stated that Robb Tyler trucks disposed of General Motors waste at the K & N location. The WITNESS stated that Fritz often picked metals out of this waste and stored the metals at the Lynhurst Road Site. The WITNESS stated that he does not know how often Fritz had this metal waste transported to the Sauer Dump located off Lynhurst Road. When asked how the metal waste was transported to the Sauer Dump, the WITNESS stated that he does not recall. When asked the name of the company that transported the waste to the K & N site, the WITNESS stated that he recalls Robb Tyler as the transporter of this waste. When asked how often Robb Tyler disposed of this waste at the K & N site, the WITNESS stated that he does not recall.

When asked the names of other generators who had waste disposed at the K & N site, the WITNESS stated that he cannot recall the names of any other generators or transporters.

The WITNESS stated that he does not know what Fritz Sauer did with the metal and copper that he stored at the Sauer Dump located off Lynhurst Road.

The WITNESS was asked if he was ever on the Sauer Dump located off Lynhurst Road. The WITNESS stated "yes." The WITNESS stated that he lived

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX Road, and as a child he played in the woods located on the area shown in the aerial photograph. The WITNESS stated that he recalls that Fritz Sauer had a truck repair shop located on the Site. The WITNESS stated that he did observe numerous trash trucks going in and out of the Sauer Dump, but he does not know if these trucks were disposing waste on the Sauer Dump. The WITNESS stated that he never worked for Fritz Sauer at the Sauer Dump location and was unable to provide any further information.

When asked the names of other individuals that worked for Fritz Sauer, the WITNESS provided the following:

- Fred Sauer
- XXXXXXXX

The WITNESS stated that Fritz had another son that worked on the Sauer Dump as a mechanic. The WITNESS stated that he cannot recall the name of this individual.

When asked the names of any other individuals that may have relevant information relating to disposal activities at the Sauer Dump located off Lynhurst Road, the WITNESS stated that he cannot recall any other names.

The WITNESS was asked to describe his employment with Robb Tyler/BFI. The WITNESS reiterated that he is a certified engine mechanic, and he was employed as a truck mechanic at the Robb Tyler garage located off 68th Street. The WITNESS stated that he worked inside the garage and had nothing to do with the landfill.

When asked if he ever drove a truck for Robb Tyler or BFI, the WITNESS stated "no."

When asked if he knew the names of any companies whose waste was disposed of at the 68th Street Dump, the WITNESS stated "no." The WITNESS stated that he had no knowledge of waste disposal activities at the 68th Street Dump.

The WITNESS was provided with a list of the following companies and asked if he had any knowledge of waste disposal by these firms. Companies of which he had knowledge have comments next to their name:
